Email: agniveshshaga@gmail.com

Mobile: +91-8639871199

Location: Hyderabad, India

EDUCATION

- **Vallurupalli Nageswara Rao Vignana Jyothi Institute of Engineering & Technology** Hyderabad, India
Bachelor of Technology - Computer Science and Engineering
Specialization: Artificial Intelligence & Machine Learning - Current CGPA: 8.53 2027 (Expected)
- **Acumen Junior College** Warangal, India
Intermediate (MPC) - Percentage: 91.6 2022
- **Shine High School** Warangal, India
10th Class - CGPA: 10 2020

KEY COURSES TAKEN

- **Computer Science and Engineering (AIML)** : Data Structures, Analysis of Algorithms, Introduction to Artificial Intelligence and Machine Learning, Object-Oriented Programming Through Java, DataBase Mangement System

SKILLS SUMMARY

Languages: C, C++, R, Java, Python, JavaScript

Web Development: HTML, CSS, React.js, Tailwind CSS

Database: MySQL, MongoDB

Platforms: Linux, Web, Windows

Tools: VS Code, Git, Windows Server

Soft Skills: Leadership, Event Management, Time Management

CS Fundamentals: Data Structures, Algorithms, OOPs

LeetCode: 1595 ([link](#))

CodeChef: 1514 (2 star) ([link](#))

Codeforces: 1157 (Newbie) ([link](#))

PROJECTS

- **Tennis Match Outcome Prediction System** May 2025
Built a machine learning model to predict ATP match winners using historical data, Elo ratings, and engineered features. Achieved 74% accuracy using ensemble models.
 - **Feature Engineering & Modeling:** Engineered 20+ features including Elo differences, head-to-head stats, and last-N performance metrics; trained and evaluated models (Elo-only, Logistic Regression, Random Forest) with optimal K-factor tuning (K=25) using 5-fold cross-validation.
 - **Tech Stack:** Python, Jupyter, Pandas, scikit-learn, Matplotlib
- **Web-Based File Sharing Platform** In Progress
Building a browser-based peer-to-peer file sharing tool using WebRTC, enabling secure transfers over LAN or WAN. Offers PIN-authenticated remote access and real-time transfer logs.
 - **Optimized Sharing:** Supports files up to 1 GB within 10 sec local network latency in test environment.
 - **Secure Sessions:** Implements 6-digit temporary PINs for room-based sharing with auto-expiry within 10 minutes.
 - **Tech Stack:** HTML, JavaScript, WebRTC, Django
- **TrainTrac- Real-Time Train Tracking System** Aug 2024
Developed a real-time train tracking system with live location updates using the IRCTC API. Provides train status, estimated arrivals, and real-time alerts for commuters via an intuitive interface.
 - **Tech Stack:** HTML, CSS, JavaScript

EXPERIENCE & ACHIEVEMENTS

- **LeetCode Coding Streak:** Maintained a 9-month daily streak, solving 329+ problems in algorithms and data structures.
- **Student Volunteer (ISTE & Kritomedh, VNR VJIET):** Core member in Technical and Design teams; mentored teams during a 24-hour hackathon, coordinated logistics, and organized events like Buzz Quest and Reel Editing Challenge with 100+ participants.
- **SEBI Investor Certification:** Scored 50/50 in SEBI Investor Exam, demonstrating strong knowledge in equity, mutual funds, and financial markets.

INTERESTS

- **Artificial Intelligence & ML:** Curious about building intelligent systems and exploring real-world AI use cases.
- **Natural Language Processing (NLP):** Fascinated by language models and their potential in creating human-like interactions and tools.
- **Web3:** Exploring decentralized technologies and understanding how blockchain is reshaping the internet.
- **Trading & Investing:** Actively involved in stock market analysis, options and futures trading, and long-term investing including IPOs and mutual funds.
- **Competitive Programming:** Enjoy solving algorithmic problems and improving coding speed and logic under constraints.
